

MEET YOUR COMFORT-FORWARD HEAVY LIFTER.

THE BOBCAT G70S-7 IC PNEUMATIC FORKLIFT

Ideal for heavy-duty lifting tasks, the Bobcat® G70S-7 IC pneumatic forklift impresses with its substantial 15,500-pound lift capacity. Boasting a robust design and superior, long-lasting components, it's suitable for any application. And user-friendly features like a comfortable compartment and Operator Sensing System ensure efficient, secure operation, job after job.

Operator Sensing System (OSS)

For increased safety during operation, the OSS automatically stops all truck movement and locks mast functions when the operator leaves the seat.

3-Point Entry and Exit System

Three separate points of contact – a handrail along the mast, a seat armrest and a large anti-slip step plate – make it easy for the operator to enter and exit the vehicle.

Easy Access to Service Areas

Servicing the vehicle is easy thanks to tool-free floor plates and a spring lock that automatically engages when the engine cover is raised.

Well-Placed LED Display

A large, bright LED display continuously monitors all vital systems to keep the operator informed of truck performance and health.

Shift Pro-Tek Transmission

Make quick shuttle applications a breeze with the market-proven Shift Pro-Tek transmission, which allows you to shift on the fly at up to 5 mph.

Industry-Proven LP Engines

LP engines provide excellent power, performance, fuel economy and durability, along with low noise and vibration.

Oil-Cooled Disc Brakes

This best-in-class braking system provides superior, long-lasting stopping power and is backed by a five-year or 10,000-working-hour warranty.

Robust Hydrostatic Steer Axle

With fewer moving parts, the hydrostatic steer axle provides low-effort steering with easy maintenance and a longer service life.

High-Capacity Air Cleaner

An air cleaner with additional capacity extends engine life and reduces maintenance costs over time.

Comfortable Operator Space

Designed for comfort, the operator space features a roomy compartment, optimized pedal positions, and an adjustable steering column and seat that allow the operator to easily find their optimum driving position.
